Definition and use of the eco-contribution

What is an eco-contribution?

The eco-contribution is part of the price of a new product: its amount offsets the cost of waste management. It is set up by the sector's eco-organisation, on behalf of the producer members.

It notably covers:

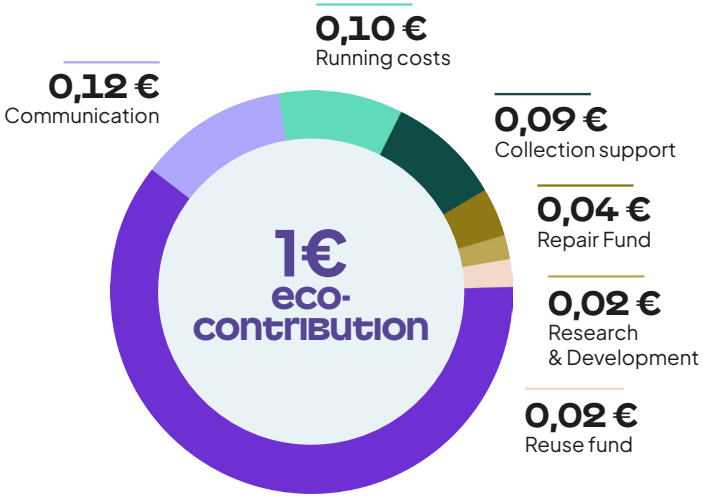
- **Waste collection and removal**
- **Decontamination and treatment**
- **Product recovery: reuse, repair, recycling…**
- **Awareness-raising initiatives**
- **Monitoring and compliance**

How is it calculated?

The amount of an eco-contribution is not calculated arbitrarily : it ties to the budget Ecologic needs to cover the end-of-life management costs of products, in accordance with the specifications set by the State.

What is it used for ?

USE OF €1 OF ECO-CONTRIBUTION PAID:



WHO, WHAT, WHEN to report?

Who has to report?

The market operator

It is always the first company that places a product or equipment on the market that bears the responsibility and the obligation to file the declaration and to pay the eco-contribution.

Who is it?

To find out who holds this role, ask yourself the following question: “Which is the first company to invoice the article on French soil, with VAT?”

What to report?

As a member of Ecologic, you must report each year **the quantities of products placed on the market in France, for the ABJ Th.** The declaration therefore corresponds to the **number of units** of products placed on the market **per fee code**, for the **elapsed period.**

- ✓ Products covered by the Environmental Code sold in mainland France and in the DROM-COM1 must be reported
- ✗ Products exported abroad shall not be reported

note

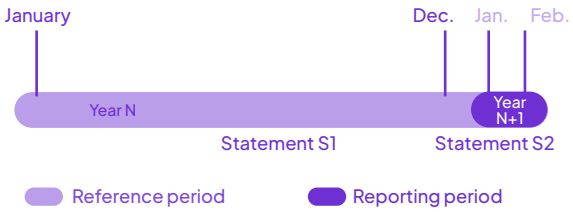
If your foreign supplier handles the declaration of the articles it supplies to you, do not include them in your own declaration

When to report?

Reporting frequencies differ depending on the quantity placed on the market that you report for the past period.

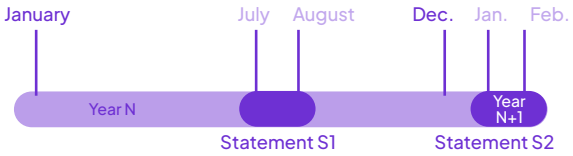
CASE 1

You place **less than 5 tonnes** on the market per year: your **reporting** frequency is **annual**



CASE 2

You place **more than 5 tonnes** on the market per year: your **reporting** frequency is **biannual**



HOW to report?

How to file-in the declaration?

The Producer Extranet: a dedicated tool

Ecologic provides you with a tool specifically dedicated to your declarations: the Producer Extranet.

Your personal space will let you:

- Manage your account
- Submit your declarations of products placed on the market
- View the history of your declarations and invoices
- Download your membership certificates
- Access the documentation provided: declaration help guide, eco-contribution fee list, declaration tutorial...

note

With Ecologic, you can also file your declarations for EEE (Electrical and Electronic Equipment), ASL (Sports and Leisure Articles), furniture, and LMT batteries (Light Means of Transport).

The information required

The information to be provided varies depending on the eco-contribution scheme you use.

Declaration based on the standard scheme, with modulations:

- Producer status
- Fee code (to identify on ABJ Th standard fee list)
- Quantity of products placed on the market
- Unit weight of the product

Declaration based on the simplified scheme:

- Producer status
- Fee code (to be identified on the simplified fee list)
- Quantity of products placed on the market

note

If the applicable modulation criteria cannot be justified, or in the event of doubt, the least favorable eco-contribution must be applied.

Entry methods

You have two options to file your declaration:

Manual mode : you enter your data and information manually in your personal space

File import : you can download a “Template” file from the “Declaration” section of your personal space. This entry method is recommended if you have many lines to declare.

notice

The annual minimum charge is 200€ excluding VAT*

The amount of the eco-contribution is indicated in € per unit. It varies based on 2 adjustment criteria, which may result in either an increase (penalty) or a decrease (bonus). If the adjustment criteria cannot be substantiated, or in case of uncertainty, the least favourable eco-contribution should be applied.

Eco-fee modulation criteria

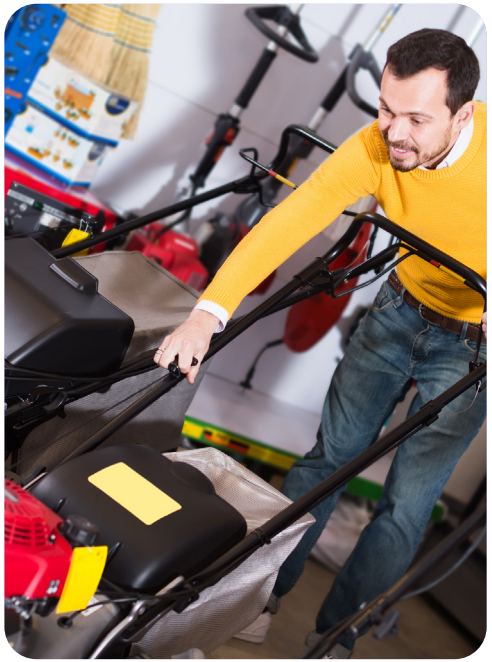
The eco fee modulation criteria, supporting documents and control procedures are detailed in the document "Eco-modulation Household EEE technical note"available in the "Documents" section of your personal account on ↘ Ecologic Producer Extranet.

2 criteria in the price list table:

• **Spare parts availability and documentation** (bonus)
A bonus is granted for products for which all spare parts are available more than 12 years after the last unit of this model was put on the market, provided that the documentation indicating the procedure for replacing a spare part is available.

• **Spare parts availability time** (penalty)
For each ABJ Th, if the average delivery time for all its spare parts is less than 15 working days, the penalty does not apply. The evaluation is based on all orders for spare parts associated with the product, without distinction of the type of part.

For example, a product A with parts AA, AB, AC and AD will need to calculate the average time taken to receive each part and then calculate a weighted average of all these times, based on the number of parts. The Eco-Fee amount change according to these 2 modulation criteria and are indicated in the price list table on each combination line.



* A minimum financial contribution is required to cover the administrative costs of reporting, invoicing and relations with ADEME.

notice

Other applicable criteria

The equipment concerned is the subject of a pre-declaration including equipment references. For details on how to submit your declaration, please contact Ecologic at the following address: declaration@ecologic-france.com

• Recycled Plastics Material (RPM)

The criterion of incorporating Recycled Plastics Materials (RPM) applies to all Household Electrical and Electronic Equipment (EEE). For RPM from post-consumer waste from EPR channels (open circuit), excluding food-grade resins, the calculation base is established on the basis of 450 € (excl. VAT) per ton, to be reduced to the mass of RPM in the equipment. For RPM from post-consumer WEEE (closed circuit), the calculation base is established on the basis of 550 € (excl.VAT) per ton, to be reduced to the mass of RPM in the equipment.

When declaring your items, the weight of pneumatic must be included in the total weight of the machine (this is because they are not declared in the pneumatic EPR). This requirement applies from January 1st 2025.

note

Following a regulatory change applicable from **January 1st 2026**, a product subject to a penalty can no longer qualify for a bonus, with the exception of bonuses linked to the use of recycled materials, in accordance with ↘ **the decree of September 5th 2025.**

For further details, please refer to the different documents available in your personal account on ↘ Ecologic Producer Extranet.

maintenance of trees, shrubs, hedges

Sub Family	Equipment	Code	ECO FEE MODULATION CRITERIA Spare parts availability > 12 years	Spare parts availability time > 15 days	Eco Fee € excl. VAT / ton
Vegetable shredder	Vegetable shredder (see the notice)	TBRVG000000			250 €
		TBRVG000001	- 25 €		225 €
