What is the eco-contribution ?

The eco-contribution is a sum paid by marketers (manufacturers, importers, distributors) for each new sports or leisure item sold in France. The amounts are paid to an approved eco-organization, such as Ecologic, and used entirely to finance the end-of-life treatment of products. Ecologic is an eco-organization, a private non-profit company, approved by the Ministry of the Environment for a period of six years.

What is this contribution used for? It helps finance the second life of sports and leisure items, in accordance with the official specifications of the EPR ASL sector (amended decree of October 27th, 2021).

In practice, it is used to:

- Collect used equipment (from stores, clubs, waste collection centers, sporting events, etc.);
- Support reuse and repair through dedicated funds (more than 21.6 million € for repair and 7.5 million € for reuse over the 2022–2027 approval period)
- Recycle materials (plastics, metals, composites, etc.) and develop recovery solutions;
- Finance communication, R&D, and local actions (e.g., on composite materials or closed-loop recycling).
- Monitor and promote compliance by Ecologic members.

Simplified price list

The price list shown below is used when the declarant doesn't know the unit mass of their items. The amounts are calculated based on high average weights. If you choose to use the simplified mode, please note that declaring modulation criteria won't be possible.

Who is eligible for this type of declaration ?

- Marketers who declare less than 5 tons of sports and leisure items.
- Request access from the Ecologic teams: declaration@ecologic-france.com

Ecologic reserves the right, depending on the circumstances, to direct the member to a standard declaration.

The annual minimum charge is 75€ excluding VAT
