

ECO FEE PRICE LIST

THERMAL DIY AND GARDEN ARTICLES

Applicable from January 1st 2026

SUMMARY

NOTICE 3

LAWN MAINTENANCE 5

MAINTENANCE OF TREES / SHRUBS / HEDGES 6

MAINTENANCE AND TILLAGE 8

OTHER THERMAL DIY AND GARDEN ARTICLES 9

**THE ANNUAL MINIMUM CHARGE
IS 200€ EXCLUDING VAT***

The amount of the eco-contribution is indicated in € per unit. It varies based on 2 adjustment criteria, which may result in either an increase (penalty) or a decrease (bonus). If the adjustment criteria cannot be substantiated, or in case of uncertainty, the least favourable eco-contribution should be applied.

ECO FEE MODULATION CRITERIA

The eco fee modulation criteria, supporting documents and control procedures are detailed in the document "**Eco-modulation ABJ Th technical note**" available in the "Documents" section of your personal account on [Ecologic Producer Extranet](#).

2 criteria in the price list table:

Spare parts availability and documentation (bonus)

A bonus is granted for products for which all spare parts are available more than 12 years after the last unit of this model was put on the market, provided that the documentation indicating the procedure for replacing a spare part is available.

Spare parts availability time (penalty)

For each ABJ Th, if the average delivery time for all its spare parts is less than 15 working days, the penalty does not apply. The evaluation is based on all orders for spare parts associated with the product, without distinction of the type of part.

For example, a product A with parts AA, AB, AC and AD will need to calculate the average time taken to receive each part and then calculate a weighted average of all these times, based on the number of parts.

The Eco-Fee amount change according to these 2 modulation criteria and are indicated in the price list table on each combination line.

* A minimum financial contribution is required to cover the administrative costs of reporting, invoicing and relations with ADEME.

OTHER APPLICABLE CRITERIA

The equipment concerned is the subject of a pre-declaration including equipment references. For details on how to submit your declaration, please contact Ecologic at the following address: declaration@ecologic-france.com

Recycled Plastics Material (RPM)

The criterion of incorporating Recycled Plastics Materials (RPM) applies to all Thermal DIY and Garden Articles (ABJ Th).

For RPM from post-consumer waste from EPR channels (open circuit), excluding food-grade resins, the calculation base is established on the basis of 450 € (excl. VAT) per ton, to be reduced to the mass of RPM in the equipment. For RPM from post-consumer ABJ Th (closed circuit), the calculation base is established on the basis of 550 € (excl. VAT) per ton, to be reduced to the mass of RPM in the equipment.

Following a regulatory change applicable from **January 1st 2026**, a product subject to a penalty can no longer qualify for a bonus, with the exception of bonuses linked to the use of recycled materials, in accordance with the **decree of September 5th 2025**.

When declaring your items, the weight of pneumatic must be included in the total weight of the machine (this is because they are not declared in the pneumatic EPR). This requirement applies from **January 1st 2025**.

For further details, please refer to the different documents available in your personal account on [Ecologic Producer Extranet](#).

Sub Family	Equipment	Eco Fee Modulation Criteria		Eco Fee € excl. VAT / ton
		Spare parts availability > 12 years	Spare parts availability time > 15 days	
String trimmer	String trimmer			250 €
