

La 2^e vie des équipements électriques

This price list of eco-contributions is intended for producers of Electrical and Electronic Equipment (EEE) **professional** members of Ecologic.

In red, the changes to the price list on 1st January, 2025 are shown.

ECO-MODULATION

From January 1st 2025, the eco-modulation system will change. It comprises three potential bonuses and a penalty. The eligibility criteria and amounts are set out in the appendix to this document.

For more details, a technical note on how to apply these eco-modulation criteria and the supporting documents to be provided, is also available.

If it is not possible to justify the eco-modulation criteria or in case of doubt, the least favorable price should be applied.

REMINDER

Accessories (such as remote controls, etc.) sold with the equipment are an integral part of the equipment. Electrical spare parts sold separately must be declared separately using the dedicated price list codes.

From 2025, the minimum annual charge will be 200€ excluding VAT.

No Brominated Flame Retardants (BFRs)

This bonus only applies to products that meet the following 3 conditions :

- 1) Proportion of plastics greater than 20% of the total mass of the equipment
- 2) Presence of plastic parts > 25g requiring the use of flame retardants
- 3) Absence of brominated flame retardants in plastic parts > 25g with the exception of cables and electronic cards

For details of the supporting documents to be supplied please refer to the technical note.

Amount of premium € excl.VAT / ton
21 €

NB: For professional print cartridges, where the price list is expressed in € per unit, the premium is 0,001€/u

Incorporation of recycled plastic materials (RPM)

Producers can benefit from this "RPM" bonus, the amount of which is set reference by reference, according to the total quantity of RPM integrated into the units placed on the market in France and subject to the WEEE EPR scheme.

2 levels of bonuses have been established, depending on the origin of the recycled material :

Origin of waste	« OPEN LOOP » :	« CLOSED LOOP » :
	RPM from post-consumer waste	RPM from post-consumer WEEE
Bonuses (VAT)	450€/t of RPM	540€/t of RPM

The above bonus amounts apply to the mass of recycled plastic incorporated in each reference placed on the market in France and not to the unit weight of the whole product. For details of the supporting documents to be provided, please refer to the technical note.

PENALTIES

Separability of the battery or accumulator

This penalty applies to a product that contains a battery or rechargeable battery that cannot be easily separated by the user using commercially available tools.

Amount of penalty € excl.VAT / ton
