ECO-CONTRIBUTIONS, A LEVER FOR THE CIRCULAR ECONOMY

DEFINITION AND USE OF THE ECO-CONTRIBUTION

What is an eco-contribution?

The eco-contribution is part of the price of a new product: its amount offsets the cost of waste management. It is set up by the sector's eco-organisation, on behalf of the producer members.

It notably covers:

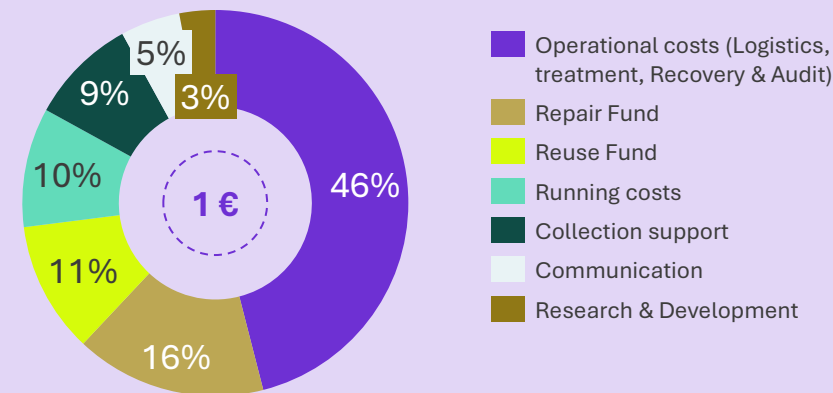

- Waste collection and removal
- Decontamination and treatment
- Product recovery: reuse, repair, recycling...
- Awareness-raising initiatives
- Monitoring and compliance

How is it calculated?

The amount of an eco-contribution is not calculated arbitrarily : it ties to the budget Ecologic needs to cover the end-of-life management costs of products, in accordance with the specifications set by the State.

What is it used for ?

Use of €1 of eco-contribution paid:

SIMPLIFIED ECO-CONTRIBUTION FEE SCHEME

Document dedicated to the **simplified eco-contribution fee scheme**

What is the simplified fee scheme ?

Description

The eco-contribution fee scheme is used to declare sports and leisure products (ASL) placed on the market under the ASL Extended Producer Responsibility (EPR) obligation.

The eco-contribution scheme presented in this document is the **simplified fee scheme**.

It is used when the declarant does not know the mass per unit of their articles. Amounts are calculated on the basis of high average weights. This reporting method **does not allow the application of eco-modulation**.

It is reserved for limited volumes, **under 5 tonnes per year**, and the eco-contribution amounts are calculated on the basis of high average weights.

For this simplified fee scheme, a **minimum annual billing** of €75 (excl. VAT) applies.

Display

For Sport and Leisure Articles (ASL), there is no obligation to display the eco-contribution amount on sales documents and invoices. For your information, this rule is different for the EEE (electrical and electronic equipment) sector.

Who can use this reporting scheme?

- Market operator reporting less than 5 tonnes of sport and leisure articles.
- Granted request access from the Ecologic teams: declaration@ecologic-france.com

Ecologic reserves the right, based on the situation, to direct the member towards a declaration under the standard fee scheme.

REPORTING YOUR PRODUCTS PLACED ON THE MARKET

WHO HAS TO REPORT, WHAT, AND WHEN?

Who has to report?

The market operator

It is always the first company that places a product or equipment on the market that bears the responsibility and the obligation to file the declaration and to pay the eco-contribution.

Who is it?

To find out who holds this role, ask yourself the following question: “Which is the first company to invoice the article on French soil, with VAT?”

If your foreign supplier handles the declaration of the articles it supplies to you, do not include them in your own declaration

What to report?

As a member of Ecologic, you must report each year **the quantities of products placed on the market in France, for the ASL**. The declaration therefore corresponds to the **number of units** of products placed on the market **per fee code**, for the **elapsed period**.

✓ Products covered by the Environmental Code sold in mainland France and in the DROM-COM¹ must be reported

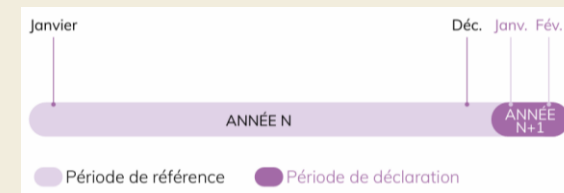

✗ Products exported abroad shall not be reported

When to report?

Reporting frequencies differ depending on the quantity placed on the market that you report for the past period.

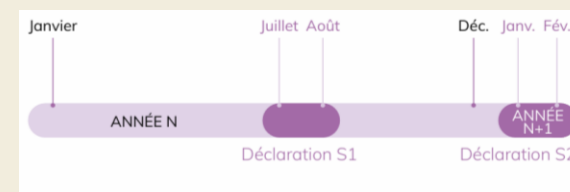

Case 1

You place **less than 5 tonnes** on the market per year: your reporting frequency is **annual**

Case 2

You place **more than 5 tonnes** on the market per year: your reporting frequency is **biannual**

1. DROM-COM: Martinique, Réunion, Guadeloupe, French Guiana, Mayotte, Saint-Martin, Saint-Pierre and Miquelon

HOW TO REPORT

How to file-in the declaration?

The Producer Extranet: a dedicated tool

Ecologic provides you with a tool specifically dedicated to your declarations: the Producer Extranet.

Your personal space will let you:

- Manage your account
- Submit your declarations of products placed on the market
- View the history of your declarations and invoices
- Download your membership certificates
- Access the documentation provided: declaration help guide, eco-contribution fee list, declaration tutorial...

Note:

With Ecologic, you can also file your declarations for EEE (Electrical and Electronic Equipment), furniture, and LMT batteries (Light Means of Transport)

The information required

For a declaration using the **simplified fee scheme**, the information to report is :

- Producer status
- Fee code (to be identified on the simplified fee list)
- Quantity of products placed on the market

Entry methods

You have two options to file your declaration:

Manual mode : you enter your data and information manually in your personal space

File import : you can download a “Template” file from the “Declaration” section of your personal space. This entry method is recommended if you have many lines to declare.

CHANGES TO THE FEE LIST FOR 2027

THE UNIVERSES OF THE SPORT & LEISURE ARTICLES

Parasports are included in the ASL EPR, and are assigned to the corresponding universes

Sport and Leisure Articles

The EPR (Extended Producer Responsibility) obligation for Sport and Leisure Articles (ASL) was created by the AGECL law and came into force in 2022. It is still recent and its features continue to evolve to better meet the sector's challenges.

The Sport & Leisure Articles EPR covers a wide diversity of products: the articles concerned vary considerably in weight, dimensions, materials, uses and collection methods.

To make it easier to identify the products covered by the ASL EPR, EcoLogic has structured the scope into 12 universes since 2025 – see on the right-hand side.

The fee list and its codes are now structured according to the sector's universes

The list of sports or activities covered by each universe is available in the appendix

UNIVERSES

A. Active Mobility – Cat. 1

B. Active Mobility – Cat. 2

C. Balls & racquets sports

D. Outdoor / Hiking

E. Athletics

F. Water sports

G. Snow & Ice

H. Skill & Precision sports

I. Verticality and Air Sports

J. Fitness and Combat sports

K. Hunting, Sport Shooting and Fishing

L. Horse Riding and Dressage

WHAT DOES CHANGE IN 2027?

Description

Only the coding changes in the 2027 simplified fee list. **The fees and list of equipment remain unchanged.**

This overhaul of the code structure follows on from the work undertaken since the introduction of the universes in 2025, as well as the overhaul of the standard fee scheme coding.

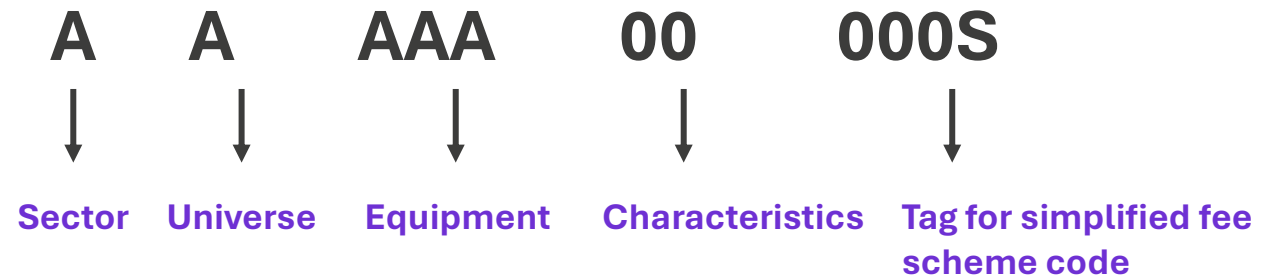

The new code structure aims to provide specific codes per universe and per equipment in the simplified fee list.

The new code structure

The **new coding** is based on a standardized and enriched format. It pursues two objectives:

- A **fixed number of characters (11 characters)** for all Sport & Leisure Articles (ASL) codes, regardless of the family or equipment concerned. This makes it easier to integrate the fee code into IT systems and allows Ecologic ASL codes to be aligned with those of household EEE.
- The use of a **precise nomenclature**, allowing the universes to be tracked.

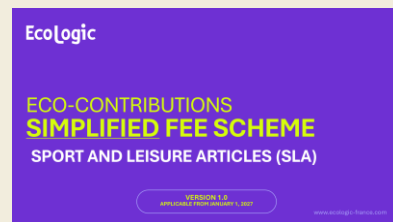

New code structure of the simplified fee scheme

TOOLS AND IMPLEMENTATION TIMELINE

Simplified fee scheme tools

Fee list & documentation (PDF format)

Fee list (Excel format)

When to report with the new fee list codes ?

The new 2027 simplified fee list will apply to **products placed on the market in 2027**.

The new coding therefore **come into force on 1st January 2027**.

Declarations with the new codes via the simplified fee scheme will take place in January 2028.

Anticipate:

The first declaration with the new codes will happen in January 2028 (for declarations using the simplified fee scheme).

However, it is essential to anticipate the recoding, which can be long and/or require adjustments to internal tools.

The earlier the re-coding process is started, the smoother the transition can be carried out, with no risk of error.

THE SIMPLIFIED 2027 FEE LIST

THE CODING RULES

REMINDER AND/OR CLARIFICATION OF CODING RULES

Declare using a single fee list

The declarant must use the codes of a single fee scheme, choosing between the standard fee list and the simplified fee list. Using together codes from both fee list is not permitted.

Declare by universe

Declare each item into the universe that reflects the sport practice or the item's main use. In case of doubt, choose the universe most consistent with the product's commercial positioning.

Report each item of a batch individually

A batch refers to several units of the same item sold together, for example, a batch of 3 tennis balls. The rule is to declare individually each item of the batch. You must multiply the item's code by the quantity contained in the batch.

Example: a batch of 3 tennis balls = 3 declarations of the 'tennis ball' code.

Declare each item of a pack

A pack refers to several different items sold together. The rule is as follows: each item in the pack must be declared separately under its respective code.

Example: a mask and fins sold together must be declared with 1 fins code and 1 mask code.
